Red River Valley & Western Railroad Safety

RRVW Safety Statistics

	<u>2021</u>	<u>2022 YTD</u>
Federal Railroad Administration (FRA) Reportable Injuries:	1	0
Federal Railroad Administration (FRA) Reportable Incidents:	1	1

Safety Information

- 2021 was the safest year in the 35-year history of the RRVW. RRVW was one dog bite away from being reportable injury free in 2021.
- The FRA reportable incident in 2021 occurred as a result of a citizen sliding into the side of a RRVW train at an at-grade crossing near Casselton.
- The FRA reportable incident in 2022 occurred as a result of a derailment within a customers' facility while RRVW was providing service.

Red River Valley & Western Railroad Service

Winter 2021/2022

RRVW experienced numerous service interruptions as a result of winter weather conditions. In total, RRVW experienced ~15 days this past winter in which service was interrupted due to winter weather conditions with 9 of the 15 days occurring in February.

Spring 2022

RRVW experienced minor and infrequent service interruptions to date as a result of spring flooding. Thus far, most of the flooding impact has been limited to minor washouts that RRVW has been able to address in a timely manner to restore service to the mainline.
