Liberty Midstream Solutions, LLC
8-inch Residue Gas Pipeline - Mountrail & Williams
Siting Application

Case No. PU-20-022

NOTICE OF FILING AND PUBLIC HEARING

March 4, 2020

A **Public Hearing** on the application in Case No. PU-20-022 is scheduled at **9:00 AM CT on April 14, 2020**, at **Neset Consulting Service, 6844 State Highway 40, Tioga, ND 58852**.

Liberty Midstream Solutions, LLC (Liberty) filed an application for a certificate of corridor compatibility and route permit concerning the location of approximately 4.7 miles of 8-inch residue gas pipeline in Mountrail and Williams County, North Dakota, as shown on the attached map.

Liberty has also filed an application for waivers of procedures and time schedules established under North Dakota Century Code sections 49-22.1-05, 49-22.1-06, 49-22.1-07, and 49-22.1-10, and North Dakota Administrative Code section 69-06-01-02 and chapter 69-06-06, requiring separate filings, separate notices, separate hearings, and separate orders on such applications. Liberty has also requested a waiver of the proposed corridor width required under North Dakota Administrative Code section 69-06-05-01(2)(f).

The issues in the application for waiver of procedures and time schedules are:

1. Are the proposed facilities of such length, design, location, or purpose that they will produce minimal adverse effects and that adherence to applicable procedures and time schedules may be waived?
2. Is it appropriate for the Commission to waive any procedures and time schedules as requested in the application?

The issues in the application for a certificate of corridor compatibility and a route permit are:

1. Will construction, operation, and maintenance of the facility at the proposed location produce minimal adverse effects on the environment and upon the welfare of the citizens of North Dakota?
2. Is the proposed facility compatible with the environmental preservation and the efficient use of resources?
3. Will construction, operation, and maintenance of the facility at the proposed location minimize adverse human and environmental impact while ensuring continuing system reliability and integrity and ensuring that energy needs are met and fulfilled in an orderly and timely fashion?
